Generated Prompt

Use the following examples to understand the answering pattern.

Example 1:

Task: What is Python?

Answer: Python is a high-level programming language.

Example 2:

Task: What is Machine Learning?

Answer: Machine Learning enables computers to learn from data without being explicitly programmed.

Example 3:

Task: What is Deep Learning?

Answer: Deep Learning is a subset of Machine Learning that uses neural networks.

Now answer this task:

Task:

What is Artificial intelligence?

Follow the pattern shown in the examples.
